

Aton International, Inc. Slashes Price for Newest Upgrade of Aton Connect for Windows Mobile Pocket PC

Summary: Expanded Help File and New Lower Price Make Aton TN3270 an Excellent Addition to Mobile Software Tools for Anyone Who Needs to Access Corporate Mainframe Systems on Pocket PCs

Los Altos Hills, CA - December 31, 2004 - Aton International, Inc., Specialists in Mobile Device Integration, Data Access and Smart Client software, today announced an upgrade to Aton Connect for Windows Mobile Pocket PC and Pocket PC Phone Edition. This upgrade features an expanded Help File with a connection troubleshooting guide and other tips for using the software.

Aton TN3270 offers a number of ease of use features including full screen landscape mode, full 3270 soft keyboard and "on the fly" session switching which allow the user to access both mainframe and corporate intranet or the Internet without having to exit a program or reset the device. This upgraded version of Aton Connect for Windows Mobile Pocket PC is targeted at IT professionals, corporate sales managers, large medical system health care providers, college and university administrators and other who want real time access to mainframe data at a very low cost.

With a new price of \$14.98 USD per single copy, reduced from \$49.95 USD, this very affordable software is available for immediate purchase and download from the company's web site, www.aton.com, and from Handango, www.handango.com and Pocket Gear, www.pocketgear.com. Free installation support is still available. Enterprise-wide licenses, ISV Embedded licenses and Source Code licenses are also available directly from Aton International, Inc. Free 30 day trial software is available for download at all three locations.

"It is clear that many managers and professionals, not just IT professionals, want to explore the possibilities of mobile access to corporate data. We're making it even easier to test new devices and develop new ways to do business without major programming or large expense." commented Charles Wilde, CTO and Founder.

Aton Connect for Windows Mobile Pocket PC combines a .NET component with a user interface that looks like the screen of a TN3270 terminal. The software can be used to view mainframe data on the Pocket PC in two ways:

1. For individuals, to download it directly to view mainframe data in the traditional 3270 "green screen" format.
2. For IT developers, to use the .NET component with our optional Host Integration Toolkit to build a "Smart Client" application that displays data in a more user friendly fashion.

Aton Connect for Windows Mobile Pocket PC has been certified by independent testing as meeting the requirements for the "Designed for Windows Mobile" logo. Aton International offer free installation support for this product. For enterprises needing help with wireless deployment, Aton offers very affordable service packages that include free licenses for Aton products. For more information about Aton's "free license" offer, contact Charles Wilde at 800-833-0835 in the US and Canada.

Aton International, Inc. has been assisting organizations for the past 20 years to merge devices and systems for reliable data delivery. The company offers products and services designed to meet the mobile device integration, data access and smart client needs of original equipment manufacturers, systems integrators and enterprise IT professionals. Aton International, Inc. is a woman-owned small business based in Northern California.
