

Aton International, Inc. Now Offering Free Toolkits for TN3270 Products on New Aton Web Site

Los Altos, California, USA - November 4, 2003 - Aton International, Inc., Specialists in Device Integration, Data Access and Smart Client Technology, today announced it is now offering free Software Development Kits for its host access ActiveX client software: Aton Connect for Pocket PC and Aton Connect for XP Tablet PC and Desktops. The free Toolkit's are available for download on Aton International's newly revamped web site www.aton.com.

"We're responding to suggestions from our customers to make it easier to evaluate our product for a particular business process improvement project. We are also expanding the resources on our new web site to make self-service easier for routine questions. Prior to this change, the Toolkits were sold as a bundle with a number of support incidents. Now developers can download the Toolkit which includes a copy of the trial version of Aton TN3270 and begin evaluating it immediately. For developers needing integration support, e-mail and phone support will continue to be available for purchase on an individual incident basis." commented Charles Wilde, CTO and Founder.

Aton International has selected eMetrix as its ecommerce provider for its new web site. eMetrix offers Aton's customers secure online ordering, as well as telephone and fax ordering. eMetrix will also accept purchase orders from qualified buyers for all of Aton's products.

Aton's new web site now includes schematic diagrams of each product, electronic download of free trial copies of products and Toolkits, online product purchase, product registration and product reference pages. Receiving purchased software on CD is also an option for a small additional cost.

"The changes we are announcing today are the first in a major initiative to provide the system integrator and developer communities with valuable content, leading edge products and cost-effective services that can be used to successfully leverage Microsoft .NET technology for their customers. We're excited about the changes just ahead for us," said Aton CEO, Constance Kobylarz.

Aton International, Inc. <www.aton.com>, has been assisting organizations for the past 20 years to seamlessly merge devices and systems for reliable data delivery. The company offers products and services designed to meet the device integration, data access and smart client needs of original equipment manufacturers, enterprise application integrators and software developers. Aton TN3270 software products offer very cost-effective, reliable solutions for host access from Pocket PC PDAs, Pocket PC phones, desktops and servers which can be used off the shelf or incorporated into a custom application. Our services team helps OEMs integrate a wide array of devices and develop software for high tech products. Aton International, Inc. is a woman-owned business.
