

## **Aton International, Inc. Makes Aton Connect for Windows Mobile Pocket PC Full Screen Landscape Display Usable on Any Pocket PC Device**

*Summary: New Landscape Display and "On the Fly" Easy Switch Menu Make Aton TN3270 the Outstanding Choice for Low Cost Terminal Emulation Software to Access both Enterprise Data from Mainframes and Web Services in Real Time*

**Los Altos Hills, CA - September 7, 2004** - Aton International, Inc., Specialists in Mobile Device Integration, Data Access and Smart Client software, today announced the release of Aton Connect for Windows Mobile Pocket PC and Pocket PC Phone Edition. This new version offers a number of ease of use features including full screen landscape mode, new soft keyboard and "on the fly" session switching which allow the user to access both mainframe and web services data without having to exit a program or reset the device. Aton Connect for Windows Mobile Pocket PC is targeted at enterprises, universities and systems integrators. The product is ideally suited for IT projects that need to deliver data to mobile workers rapidly at low cost.

Priced at \$49.95 per single copy, the software will be available for purchase and download from the company's web site, [www.aton.com](http://www.aton.com), and from Handango, [www.handango.com](http://www.handango.com) and Pocket Gear, [www.pocketgear.com](http://www.pocketgear.com). Discounts are available for volume purchases. Enterprise-wide and source code licenses are also available directly from Aton International, Inc. Free 30 day trial software is available for download at all three locations.

"We are committed to providing products and services that help enterprises maximize their existing IT investment. Batch processing of data, while very efficient, creates times lags that can prevent workers from taking immediate action. The upgrades we have made to Aton Connect for Windows Mobile Pocket PC make it easier for enterprises to get essential data out to mobile workers in real time without time-consuming mainframe programming or costly middleware." commented Charles Wilde, CTO and Founder.

Aton Connect for Windows Mobile Pocket PC combines a .NET component with a user interface that looks like the screen of a TN3270 terminal. The software can be used to view mainframe data on the Pocket PC in two ways:

1. Download it directly to view mainframe data in the traditional 3270 "green screen" format.
2. Use the .NET component with our optional Toolkit to build a "Smart Client" application that does more than just display mainframe screens.

Aton Connect for Windows Mobile Pocket PC has been certified by independent testing as meeting the requirements for the "Designed for Windows Mobile" logo.

Aton International, Inc. has been assisting organizations for the past 20 years to merge devices and systems for reliable data delivery. The company offers products and services designed to meet the mobile device integration, data access and smart client needs of original equipment manufacturers, systems integrators and enterprise IT professionals. Aton International, Inc. is a woman-owned small business.
