### Deliver Successful Mobile & Embedded Solutions Faster

Companies of all sizes—OEMs, ISVs and SI/VARs—rely on Aton International, Inc. to develop mobile or remote products and solutions that add to revenue, reduce costs, and increase customer satisfaction. If you have an urgent project that must get done right or a problem that has baffled your staff, our senior level staff will deliver a successful result.

Our staff can deliver your solution on Windows Mobile, Windows CE, XP Embedded and Tablets. We have recently added Android and iPhone to our portfolio. Do you need one device or large networked systems? Your project will get the same level of attention and care. Small projects are welcome. All work is done in the US so we are easy to reach.

### Knowledgeable Help with Firmware, Applications and Integration

Our key staff have been developing embedded and networked systems for over 20 years. In addition to mobile and wireless devices, Aton International, Inc. enables companies to add other leading edge technologies, such as biometric imaging, physical access control, GPS and other augmented reality features to their solutions. We develop device drivers, custom board support packages as well as mobile and embedded software. Our staff can assist with planning, new system architecture design/review, or troubleshooting a problem with an existing project or application.

Because we develop and market a set of mobile business applications for remote access to enterprise servers, we understand that your product needs to delight your customers, minimize maintenance costs and perform reliably. Our staff will apply the knowledge gained from our apps to give you an outstanding result for yours

**Here's a comment from one of our satisfied customers:** "Thank you for the completion of the Exacta-Mix™ 2400 Operating System work for Baxa Corporation. We found working with Aton a professional and rewarding experience. The technical work performed was of superior quality and within time expectations. Although we encountered some technical difficulties, the issues surfaced quickly, and were resolved in a timely and satisfactory manner. Baxa appreciates your time and efforts making the contract work successfully." Mark O. Soderberg Director, Product Development, Baxa Corporation

### Assisting Customers Since 1981

Established in California in 1981, Aton International, Inc. shipped its first product, a personal computer operating system, that same year. Our expertise expanded to include networks, from Windows 9x to Windows NT to Windows 2000/XP. Aton entered expanded into Web server applications in 1996. We entered the mobile arena in 2001 launching our first Pocket PC product in 2002 and continue to develop apps for Windows Phone. In 2009, we expanded into Android and iPhone. Our CTO and Founder, Charles A. Wilde, published a popular ebook, **Porting Native Code to Android**, in November 2009.
